

Product name	Anti-SARS-CoV-2 N Protein antibody(12H1)
Description	SARS-CoV-2 Nucleocapsid Protein is associated with nucleic acid. It is the most abundant protein for coronavirus. Because of the strong immunogenicity of coronavirus Nucleocapsid, it is believed that SARS-CoV-2 Nucleocapsid Protein has potential value for the diagnosis of the virus.
Antigen	SARS-CoV-2-N protein
Application	ELISA
Reactivity	SARS-CoV-2-N protein
Form	Mini-body(Chicken scFv + Human IgG Fc)
Storage	This Proteins are stable for 6 months at -20°C to -80°C. Recommended that the protein be aliquot and Avoid repeated freeze-thaw cycles.
Concentration	1mg/ml
Purify	>90%(SDS-PAGE)
Clonality	Monoclonal antibody
Alternative name	Severe acute respiratory syndrome coronavirus 2 nucleocapsid, 2019 novel coronavirus nucleoprotein, SARS-CoV-2 NP, SARS-CoV-2 N protein, COVID-19
